Fund Objective

The Index Funds S&P 500® Equal Weight seeks to replicate, before fees and expenses, the total return of the S&P 500® Equal Weight Index.

S&P 500® Equal Weight Index

The S&P 500® Equal Weight Index is the equal weight version of the S&P 500® Index. It contains the same constituents as the cap-weighted S&P 500®, but each company in the S&P 500® Equal Weight Index is allocated the same weight at each quarterly rebalance. Therefore, the holdings are balanced across all of the S&P 500® companies evenly over time. Whereas, the cap-weighted S&P 500® Index over-weights the 50 largest companies with close to 50% of the holdings.¹

Our Benchmark

Since 1957, the S&P 500® Index has been regarded as the best single gauge of the U.S. Equities market. There is over \$9.9 trillion USD benchmarked to the index, with index assets comprising approximately \$3.4 trillion USD of this total.² The index includes 500 leading companies and captures approximately 80% coverage of available market capitalization.
